Subject: RE: Sandstone Consultation Discussion

Good morning,

I spoke with Cliff Redeye a few moments ago. He confirmed that they would like to consult on Sandstone even though they declined our consultation offer for Bull Run – which was also an Enhanced Recovery project. He told me that with so many of our permits coming on their radar, they want to get a better understanding of what enhanced recovery is. He also told me that they'd like to have a meeting with us, just as they did with Roulette & Catalyst. I told him that from an EPA standpoint, we can focus on what enhanced recovery is so they feel a little more comfortable with this permit.

I told him I would propose some times in the next few weeks. Unfortunately he's not available the next couple of weeks basically due to the holiday so we're looking at June 7-11th as being the first time we can meet. I'll look at everyone's availability starting with that week and propose three different meeting times. He said that's what the Nation would prefer because it forces their counselors to choose one of those times.

I'm also going to forward him the permit application today as well so they can start developing their comments and questions they'd like to ask us.

Please let me know if you have any comments or concerns on this process moving forward.

Thanks,

Kevin Rowsey

Subject: Sandstone Consultation Discussion

Good morning all,

Yesterday, the new proposed Penneco UIC well was brought up on our call and the location of the well in relation to the Upper Allegheny Watershed. The Penneco well is located in Allegheny County, quite a distance from the watershed, but I asked the GIS team to map the new well to confirm that the well is outside of the watershed. Matt Frank provided the attached map and indeed the well is not in the watershed, and consequently, does not require a consultation with the Seneca Nation.

Please let me know if you have any questions about the proposed well.

Thanks,

Kevin Rowsey
